

Wheel of Fortune

Use definite colors for definite results desired. According to ancient science of color, you should use:

Green or gold for financial, job or career success

Yellow or white for increased spiritual understanding

Blue for intellectual accomplishments, such as writing a book or finishing studies toward a degree

Orange or bright yellow for health, energy, a more vital life

Pink, rose or warm red for love, harmony, marriage, happiness in human relationships

TIPS:

- Use colored pictures, rather than black & white
- Do not clutter your board, unless you want cluttered results
- On your financial board, put money, not just things you want. Otherwise you may get the things, plus indebtedness
- Place a spiritual symbol on your poster board such as a picture of the Christ or the Bible. This gives your desires a spiritual protection, and opens the way for what you have pictured (or something better) to come to you.
- View your wheel of fortune every day, preferably just before sleeping. The more often you view your pictured desires, the quicker results will come.
- Keep quiet about your pictures. Do not discuss them or try to convince others to try this method. The words secret and sacred have the same root meaning. What is sacred should be secret.
